This assembly quote assumes:

PRICE	\$1,705.05
-------	------------

- Your quote covers assembly labor costs only - if you have placed a turn-key order, we will contact you shortly with the additional component costs.
- Your assembly fits within our standard capabilities and terms and conditions as listed on the SERVICES / CAPABILITIES page and the TERMS page on the Screaming Circuits web site. Services outside of our standard capabilities or outside of our terms and conditions will increase the build time and add fees not included in this quote.
- Your kit is complete, your parts are identified and you don't mix kits from different jobs in the same box.
- The files you send us are complete and accurate.
- This quote is accurate as of the date of issue but prices are subject to change without notice after that.
- Shipping is not included in this quote.

Note that if you send us non-functioning components or pcbs in your kit, we are not liable for repair, rework or replacement of the assembly. We strongly recommend that your boards be electrically tested at the board fab house and have complete solder mask and silk screen.
